Luca Nicolás Baello

Fullstack Software Engineer | React · Next.js · C# / .NET 8 · SQL Server · Azure DevOps

Buenos Aires, Argentina | luca.baello@gmail.com | +54 11 5339-3386 | linkedin.com/in/luca-baello

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5 years of experience architecting and shipping mission-critical web and mobile applications end-to-end. Specialized in modern **React / Next.js** frontends coupled with resilient **C# / .NET 8** backends using Clean Architecture. Proven track record in performance engineering, enterprise security, **Azure DevOps CI/CD** pipelines, offline-first mobile apps, and integrating advanced AI developer tooling to accelerate delivery cycles.

TECHNICAL SKILLS

Frontend: React 19, Next.js 15, TypeScript, JavaScript, Zustand, Tailwind CSS, PrimeReact, MUI, PWA / Offline-First

Backend: C# / .NET 8, ASP.NET Core, EF Core, Node.js, Express, REST APIs, WebSockets (SignalR), Clean Architecture

Databases: SQL Server, MySQL, PostgreSQL, query plan optimization, index tuning, N+1 query elimination

DevOps & Cloud: Azure DevOps, CI/CD YAML pipelines, Docker, IIS, self-hosted agents, on-premise & cloud deployments

Testing & QA: Playwright, Vitest, xUnit, automated end-to-end regression testing, integration testing

Applied AI: Claude, OpenAI Codex, GitHub Copilot, local LLMs (Ollama), MCP, advanced prompt engineering

PROFESSIONAL EXPERIENCE

Fullstack Software Engineer · Grupo CETA Capital Humano — Aug 2024 – Sep 2026 | Buenos Aires, Argentina

- Delivered features across **6 production enterprise systems**, completing **749 out of 769 work items (97.4% delivery rate)**.
- **Security & Authentication:** Architected the organization's central JWT scheme with rotating and revocable refresh tokens. Detected and patched a critical **timing attack vulnerability** in authentication, cutting the exploitable window from **46ms down to 0.77ms** backed by automated tests.
- **Database & Network Optimization:** Overhauled SQL queries in core operational views, reducing database roundtrips from **13 to 6 queries** and front-to-back requests from **41 to 2**, eliminating severe N+1 bottlenecks.
- **Web Performance:** Implemented manual vendor code-splitting and dynamic route loading, shrinking SPA initial bundle from **1.4 MB to 533 KB (−63%)** for faster Time-to-Interactive.
- **Logistics & Offline-First Mobile:** Built the interactive route planner with map visualization and dynamic stops reordering; created an **offline-first PWA** timekeeping app with GPS, camera integration, and reliable background synchronization.
- **DevOps:** Maintained continuous CI/CD pipelines in **Azure DevOps** (YAML, self-hosted build agents) and managed releases to on-premise IIS servers.

Fullstack Developer · Universidad Nacional de Hurlingham — Mar 2023 – Oct 2023 | Buenos Aires

- Built web apps for government bodies and corporate clients using React, Node.js, Express, PHP, MySQL, and Tailwind CSS.
- Collaborated within agile teams (Scrum/Kanban) and managed version control workflows on GitHub.

Network & Technical Support Specialist · Telecentro — Oct 2023 – Aug 2024 | Buenos Aires

- Resolved advanced networking and infrastructure incidents covering FTTH, IP routing, Wi-Fi mesh systems, and VoIP.

Corporate Project Coordinator · Claro Argentina — Jun 2022 – Mar 2023 | Buenos Aires

- Managed corporate accounts; built internal CRM tool with PHP and SQL; automated reporting workflows using Python scripts.

KEY PROJECTS

Ceta-Logística (TMS/WMS): .NET 8 + React 19 + Capacitor, 50+ modules, live tracking and dual driver/depot app.

FletAR Real-Time: Flutter mobile app + .NET 8 backend with PostGIS, real-time GPS and SignalR chat.

EDUCATION

B.S. in Computer Science (Licenciatura en Informática) In progress

Universidad Nacional de Hurlingham (UNAHUR)

LANGUAGES

Spanish: Native

English: Intermediate / Professional (B1/B2 - technical conversations & documentation)
