Luca Nicolás Baello

Fullstack Software Engineer | React · Next.js · C# / .NET 8 · SQL Server · Azure DevOps

Buenos Aires, Argentina · luca.baello@gmail.com · +54 11 5339-3386 · linkedin.com/in/luca-baello · github.com/lucabaello1998 · lucabaello1998.github.io

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5 years architecting and shipping mission-critical web and mobile applications end-to-end. Specialized in modern React / Next.js frontends coupled with robust C# / .NET 8 backends using Clean Architecture. Proven track record in performance engineering, enterprise security, Azure DevOps CI/CD pipelines, offline-first mobile apps, and applying AI developer tooling to accelerate delivery.

TECHNICAL SKILLS

Frontend: React 19, Next.js 15, TypeScript, JavaScript, Zustand, Tailwind CSS, PrimeReact, MUI, PWA / Offline-First

Databases: SQL Server, MySQL, PostgreSQL / PostGIS, query plan optimization, index tuning, N+1 query elimination

Testing & QA: Playwright, Vitest, xUnit, automated end-to-end regression testing, integration testing

Backend: C# / .NET 8, ASP.NET Core, EF Core, Node.js, Express, REST APIs, WebSockets (SignalR), Clean Architecture, CQRS

DevOps & Cloud: Azure DevOps, CI/CD YAML pipelines, Docker, IIS, self-hosted agents, on-premise & cloud deployments

Applied AI: Claude, OpenAI Codex, GitHub Copilot, OpenCode, local LLMs (Ollama), MCP, developer tooling

PROFESSIONAL EXPERIENCE

Fullstack Software Engineer · Grupo CETA Capital Humano

Aug 2024 – Sep 2026 | Buenos Aires, Argentina

Delivered features across 6 production enterprise systems, completing 749 out of 769 work items (97.4% delivery rate).

- **Security & Authentication:** Architected the central JWT scheme with rotating, revocable refresh tokens. Detected and patched a critical timing attack vulnerability, cutting the exploitable window from 46 ms down to 0.77 ms, backed by automated tests.
- **Database, Network & Web Performance:** Overhauled SQL queries in core views, cutting database roundtrips from 13 to 6 queries and front-to-back requests from 41 to 2, eliminating N+1 bottlenecks. Added vendor code-splitting and dynamic route loading, shrinking the SPA bundle from 1.4 MB to 533 KB (−63%).
- **Logistics & Offline-First Mobile:** Built the interactive route planner with map visualization and dynamic stop reordering; created an offline-first PWA timekeeping app with GPS, camera and background synchronization.
- **ERP & Management Modules:** Developed master-data modules for inventory, stock and employee records, plus a regulatory document platform with native PDF viewing and multi-level approvals.
- **DevOps:** Maintained CI/CD pipelines in Azure DevOps (YAML, self-hosted agents) and managed releases to on-premise IIS, handling 86 environment merges and 705 own commits.

Network & Technical Support Specialist · Telecentro

Oct 2023 – Aug 2024 | Buenos Aires

- Resolved advanced networking and infrastructure incidents covering FTTH, IP routing, switches, Wi-Fi mesh systems and VoIP.
- Advanced technical support for residential and corporate customers with strict SLA compliance.

Fullstack Developer · Universidad Nacional de Hurlingham

Mar 2023 – Oct 2023 | Buenos Aires

- Built web apps for government bodies and corporate clients using React, Node.js, Express, PHP, MySQL and Tailwind CSS.
- Collaborated within agile teams (Scrum/Kanban) and managed version control workflows on GitHub.

Corporate Project Coordinator · Claro Argentina

Jun 2022 – Mar 2023 | Buenos Aires

- Managed corporate accounts; built an internal CRM tool with PHP and SQL.
- Automated reporting workflows with Python scripts, cutting 40% of the processing time for administrative reports.

KEY PROJECTS

FletAR: Freight marketplace (Flutter + .NET 8 + PostgreSQL/PostGIS + SignalR): blind bidding, real-time tracking and identity verification. github.com/lucabaello1998/FletAR

OpenCockpit: Electron, React and TypeScript desktop app that centralizes sessions, tokens and cost metrics from AI coding tools. github.com/lucabaello1998/OpenCockpit

liquid-glass-lab: React 19, TypeScript and Tailwind v4 UI lab: real-time SVG refraction with feDisplacementMap and SDF, plus dnd-kit drag & drop. github.com/lucabaello1998/liquid-glass-lab

direcciones_ar: Dart package with CI for Argentine address autocomplete and reverse geocoding on Nominatim. github.com/lucabaello1998/direcciones_ar

EDUCATION

B.S. in Computer Science (Licenciatura en Informática) In progress

Universidad Nacional de Hurlingham (UNAHUR)

Coursework in algorithms, data structures, concurrent systems design and relational databases.

LANGUAGES

Spanish: Native

English: B1/B2 (technical conversations, documentation & writing)
